NOTE: Transmittal 13, dated February 2017, is being rescinded and replaced by Transmittal 14, dated March 2017, to change the effective date from "cost reporting periods ending on or after September 30, 2016," to "cost reporting periods ending on or after December 31, 2016." The only other change in this transmittal is the Julian date for the ECR specification date on page 29-504 that has changed from "2016274" to "2016366". All other information remains the same.

NEW/REVISED MATERIAL--EFFECTIVE: Cost reporting periods ending on or after December 31, 2016.

This transmittal updates Chapter 29, Independent Rural Health Clinic (RHC)/Freestanding Federally Qualified Health Centers (FQHC) Cost Report (Form CMS-222-92) to reflect clarifications and corrections to existing instructions. The effective dates for changes vary. 2900. GENERAL

These forms must be used by all independent rural health clinics (RHCs) and freestanding Federally qualified health centers (FQHCs). These forms are required for determining Medicare payment for RHC and FQHC services under 42 CFR 405, Subpart X.

NOTE: For cost reporting periods beginning on or after October 1, 2014, freestanding FQHCs are reimbursed under a prospective payment system and must file using Form CMS-224-14 (Freestanding FQHC Cost Report), not the Form CMS-222-92.

An RHC/FQHC must complete all applicable items on the worksheets. For its initial reporting period, the facility completes these worksheets with estimates of costs and visits and other information required by the reports. The contractor uses the estimates to determine an interim rate of payment for the facility. Following the end of the facility's reporting period, the facility is required to submit its worksheets using data based on its actual experience for the reporting period. This information is used by the contractor for determining the total Medicare payment due the RHC/FQHC for services furnished Medicare beneficiaries.

2900.1 <u>Rounding Standards for Fractional Computations.</u>—Throughout the Medicare cost report, required computations result in the use of fractions. Use the following rounding standards for such computations:

- 1. Round to 2 decimal places:
 - a. Rates
 - b. Cost per visit
 - c. Cost for pneumococcal vaccine
- 2. Round to 6 decimal places:
 - a. Ratios
 - b. Limit adjustments

2904. WORKSHEET A - RECLASSIFICATION AND ADJUSTMENT OF TRIAL BALANCE OF EXPENSES

Use Worksheet A to record the trial balance of expense accounts from your books and records. The worksheet also provides for the necessary reclassification and adjustments to certain accounts. All cost centers listed do not apply to all RHCs/FQHCs using this worksheet. For example, a facility might not employ laboratory technicians and does not, in that case, complete line 8. In addition to those lines listed, the worksheet also provides blank lines for other facility cost centers.

If the cost elements of a cost center are maintained separately on your books, a reconciliation of costs per the accounting books and records to those on this worksheet must be maintained by you and are subject to review by your contractor.

Under certain conditions, a provider may elect to use different cost centers for allocation purposes. These conditions are stated in CMS Pub. 15-1, *chapter 23*, §2313.

Standard (i.e., preprinted) CMS line numbers and cost center descriptions cannot be changed. If a provider needs to use additional or different cost center descriptions, it may do so by adding additional lines to the cost report. Added cost centers must be appropriately coded. Identify the added line as a numeric subscript of the immediately preceding line. That is, if two lines are added between lines 5 and 6, identify them as lines 5.01 and 5.02. If additional lines are added for general services cost centers.

Also, submit the working trial balance of the facility with the cost report. A working trial balance is a listing of the balances of the accounts in the general ledger to which adjustments are appended in supplementary columns and is used as a basic summary for financial statements.

Cost center coding is a methodology for standardizing the meaning of cost center labels as used by health care providers on the Medicare cost reports. The Form CMS-222-92 provides for preprinted cost center descriptions that may apply to RHC/FQHC services on Worksheet A. In addition, a space is provided for a cost center code. The preprinted cost center labels are automatically coded by CMS approved cost reporting software, hereafter referred to as the standard cost centers. One additional cost center description with general meaning has been identified. This additional description will hereafter be referred to as a nonstandard label with an "Other..." designation to provide for situations where no match in meaning to the standard cost centers can be found. Refer to Worksheet A, line 9.

The use of this coding methodology allows providers to continue to use labels for cost centers that have meaning within the individual institution. The four digit cost center codes that are associated with each provider label in their electronic file provide standardized meaning for data analysis. The preparer is required to compare any added or changed label to the descriptions offered on the standard or nonstandard cost center tables. A description of cost center coding and the table of cost center codes are in Table 5 of the electronic reporting specifications.

Column Descriptions

<u>Columns 1 through 3.--</u>The expenses listed in these columns must be in accordance with your accounting books and records.

Enter on the appropriate lines in columns 1 through 3 the total expenses incurred during the reporting period. Detail the expenses as Compensation (column 1) and Other (column 2). This cost center does not include normal operating and capital related costs. If the overhead costs for the direct GME are not identified and recorded on this line in columns 1 or 2, a reclassification to this cost center is required. <u>Line 55.50</u>.--This cost center includes the cost related to the structured recording of patient health information, an electronic health care plan addressing all health issues, access to chronic care management (CCM) services, managing care transitions, and coordinating and sharing patient information with practitioners and providers outside the practice. CCM services are reimbursed as an add-on payment based on the Medicare Physician Fee Schedule (MPFS). See 80 FR 71080 (November 16, 2015).

<u>Line 55.60</u>.--This cost center includes the cost of telehealth distant-site services as described in CMS Pub. 100-02, Medicare Benefit Policy Manual, chapter 13, Rural Health Clinic (RHC) and Federally Qualified Health Center (FQHC) Services, §190.

<u>Line 62</u>.--This is the total cost of the facility. It is the sum of the amounts on lines 25, 50, 57, and 61.

2905. WORKSHEET A-1 - RECLASSIFICATION

This worksheet provides for the reclassification of certain amounts to effect the proper cost allocation. The cost centers affected must be specifically identifiable in your accounting records. Use reclassifications in instances in which the expenses applicable to more than one of the cost centers listed on Worksheet A are maintained in your accounting books and records in one cost center. For example, if a physician performs administrative duties, the appropriate portion of his/her compensation, payroll taxes and fringe benefits must be reclassified from "Facility Health Care Staff Cost" to "Facility Overhead", line 38 for the office salaries and line 45 for the benefits and taxes.

2906. WORKSHEET A-2 - ADJUSTMENTS TO EXPENSES

This worksheet provides for adjusting the expenses listed on Worksheet A, column 5. Make these adjustments, which are required under the Medicare principles of reimbursement, on the basis of cost, or amount received. Enter the total amount received (revenue) only if the cost (including the direct cost and all applicable overhead) cannot be determined. However, if total direct and indirect cost can be determined, enter the cost. Once an adjustment to an expense is made on the basis of cost, you may not, in future cost reporting periods determine the required adjustment to the expense on the basis of revenue. Enter the following symbols in column 1 to indicate the basis for adjustments: "A" for costs and "B" for amount received. Line descriptions indicate the more common activities which affect allowable costs or result in costs incurred for reasons other than patient care and, thus, require adjustments.

Types of items to be entered on this worksheet are (1) those needed to adjust expenses incurred, (2) those items which constitute recovery of expenses through sales, charges, fees, etc., and (3) those items needed to adjust expenses in accordance with the Medicare principles of reimbursement. (See CMS Pub. 15-1, *chapter 23*, §2328.)

If an adjustment to an expense affects more than one cost center, record the adjustment to each cost center on a separate line on this worksheet.

Line Descriptions

<u>Line 1</u>.--Investment income on restricted and unrestricted funds which are commingled with other funds must be applied together against the total interest expense included in allowable costs. (See CMS Pub. 15-1, *chapter 2*, §202.2.)

Apply the investment income on restricted and unrestricted funds which are commingled with other funds against the Administrative, Depreciation - Buildings and Fixtures, Depreciation - Equipment, and any other appropriate cost centers on the basis of the ratio that interest expense charged to each cost center bears to the total interest expense charges to all of your cost centers.

29-7.1 Rev. 14

This page is reserved for future use.

<u>Line 5.</u>--Enter the allowable home office costs which have been allocated to the facility. Use additional lines to the extent that various facility cost centers are affected. (See CMS Pub. 15-1, chapter 21.)

<u>Line 6</u>.--Obtain the amount to be entered on this line from Supplemental Worksheet A-2-1, Part II, column 6, line 5. Note that Worksheet A-2-1, Part II, lines 1 through 4, represent the detail of the various cost centers to be adjusted on Worksheet A.

<u>Line 8.--Enter the amount which represents the allowable cost of the services furnished by Public Health Service personnel.</u> Obtain this amount from your contractor.

<u>Line 8.10</u>.--Enter RCE adjustments for teaching physicians. RCE limits apply to the total compensation of the teaching physician (salary and fringe benefits) associated with teaching residents "direct GME" activities. See 42 CFR 415.60 and 415.70.

<u>Lines 9 and 10.</u>--If depreciation expense computed in accordance with Medicare principles of reimbursement differs from depreciation expenses per your books, enter the difference on lines 9 and/or 10.

2907. WORKSHEET B - VISITS AND OVERHEAD COST FOR RHCs/FQHCs

Worksheet B is used by the RHC/FQHC to summarize (1) the visits furnished by your health care staff and by physicians under agreements with you, and (2) the overhead costs incurred by you which apply to RHC/FQHC services.

2907.1 Part I - Visits and Productivity.--Use Part I to summarize the number of facility visits furnished by the health care staff and to calculate the number of visits to be used in the rate determination. Productivity standards established by CMS are applied as a guideline that reflects the total combined services of the staff. Apply a level of 4200 visits for each physician and a level of 2100 visits for each nonphysician practitioner.

Lines 1 through 9 (and applicable subscripts) of Part I list the types of practitioners (positions) for whom facility visits must be counted and reported.

<u>Line 1</u>--Enter the number of FTEs and total visits furnished to facility patients by staff physicians working at the facility on a regular ongoing basis. Also include on this line, physician data (FTEs and visits) for services furnished to facility patients by staff physicians working under contractual agreement with you on a regular ongoing basis in the RHC/FQHC facility. These physicians are subject to productivity standards. See 42 CFR 405.2468(d)(2)(v).

<u>Column 1.</u>--Record the number of all full time equivalent (FTE) personnel in each of the applicable staff positions in the facility practice. (See IOM 100-04, chapter 9, §40.3, for a definition of FTEs.)

<u>Column 2</u>.--Record the total visits actually furnished to all patients by all personnel in each of the applicable staff positions in the reporting period. Count visits in accordance with instructions in 42 CFR 405.2401(b) defining a visit.

<u>Column 3.</u>--Productivity standards established by CMS are guidelines that reflect the total combined services of the staff. Apply a level of 4200 visits for each physician and 2100 visits for each nonphysician practitioner. However, if you were granted an exception to the productivity standards (answered yes to question 8.51 of Worksheet S, Part I), enter on lines 1 *through* 3 the number of productivity visits approved by the contractor.

Contractors have the authority to waive productivity guidelines in cases where you have demonstrated reasonable justification for not meeting the standard. In such cases, the contractor

29-8 Rev. 14

may set any number of visits as reasonable (not just actual visits) if an exception is granted. For example, if the guideline is 4200 visits and you furnished only 1000 visits, the contractor may permit 2500 visits to be used in the calculation.

<u>Column 4.</u>--This is the minimum number of facility visits the personnel in each staff position are expected to furnish. Enter the product of column 1 and column 3.

Column 5.--Enter the greater of the visits from column 2 or column 4. Contractors have the authority to waive the productivity guideline in cases where you have demonstrated reasonable justification for not meeting the standard. In such cases, the contractor could set any number of visits as reasonable (not just your actual visits) if an exception is granted. For example, if the guideline number is 4200 visits and you have only furnished 1000 visits, the contractor need not accept the 1000 visits but could permit 2500 visits to be used in the calculation.

<u>Line 4</u>.--Enter the total of lines 1 through 3.

Line 8.--Enter the total of lines 4 through 7.

<u>Line 9.</u>--Enter the number of visits furnished to facility patients by physicians under agreement with you who do not furnish services to patients on a regular ongoing basis in the RHC/FQHC facility. Physician services under agreements with you are (1) all medical services performed at your site by a non-staff physician who is not the owner or an employee of the facility, and (2) medical services performed at a location other than your site by such a physician for which the physician is compensated by you. While all physician services at your site are included in RHC/FQHC services, physician services furnished in other locations by physicians who are not on your full time staff are paid to you only if your agreement with the physician provides for compensation for such services.

2907.2 <u>Part II - Determination of Total Allowable Cost Applicable To RHC/FQHC Services.</u>--Use Part II to determine the amount of overhead cost applicable to RHC/FQHC services.

<u>Line 10</u>.--Enter the cost of RHC/FQHC services (excluding overhead) from Worksheet A, column 7, line 25, less the amount on Worksheet A, column 7, line 20.50.

<u>Line 11</u>.--Enter the cost of services (other than RHC/FQHC services) excluding overhead from Worksheet A, column 7, sum of lines 57 and 61.

Line 12.--Enter the cost of all services (excluding overhead). It is the sum of lines 10 and 11.

<u>Line 13</u>.--Enter the percentage of RHC/FQHC services. This percentage is determined by dividing the amount on line 10 (the cost of RHC/FQHC services) by the amount on line 12 (the cost of all services, excluding overhead).

<u>Line 14.</u>--Enter the total overhead costs incurred from Worksheet A, column 7, line 50. It is the sum of facility costs and administrative overhead costs.

Line 14.01.--Do not complete this line.

Line 14.02.--Enter the *amount* from line 14.

<u>Line 15.</u>--Enter the overhead amount applicable to RHC/FQHC services. Multiply the amount on line 13 (the percentage of RHC/FQHC services) by the amount on line 14.02 (total overhead).

<u>Line 16.</u>--Enter the total allowable cost of RHC/FQHC services. It is the sum of line 10 (cost of RHC/FQHC services other than overhead services) and line 15 (overhead services applicable to RHC/FQHC services).

2908. WORKSHEET C - DETERMINATION OF MEDICARE PAYMENT

Use this worksheet to determine the interim all inclusive rate of payment and the total Medicare payment due you for the reporting period.

2908.1 <u>Part I - Determination of Rate For RHC/FQHC Services</u>.--Use Part I to calculate the cost per visit for RHC/FQHC services and to apply the screening guideline established by CMS on your health care staff productivity.

Line 1.--Enter the total allowable cost from Worksheet B, Part II, line 16.

<u>Line 2</u>.--Enter the total cost of pneumococcal and influenza vaccine from Supplemental Worksheet B-1, line 15.

Line 3.--Subtract the amount on line 2 from the amount on line 1 and enter the result.

<u>Line 4</u>.--Enter the greater of the minimum or actual visits by the health care staff from Worksheet B, Part I, column 5, line 8.

<u>Line 5</u>.--Enter the visits made by physicians under agreement from Worksheet B, Part I, column 5, line 9.

<u>Line 6.</u>--Enter the total adjusted visits (sum of lines 4 and 5).

<u>Line 7.</u>--Enter the adjusted cost per visit. This is determined by dividing the amount on line 3 by the visits on line 6.

<u>Lines 8 through 18.</u>—Complete columns 1 and 2 of lines 8 through 18 to identify costs and visits affected by different payment limits during a cost reporting period. For lines 11 through 18, enter in column 3 the sum of columns 1 and 2 (and 2.01, if applicable). Enter the rates and the corresponding data chronologically in the appropriate column as they occur during the cost reporting period. For example, if only one payment limit is applicable during the cost reporting period complete column 1 only. Column 2 can be subscripted to accommodate the possibility of three per visit limits during a cost reporting period.

For services rendered from January 1, 2010, through December 31, 2013, the maximum rate per visit entered on line 8 and the outpatient mental health treatment service limitation applied on line 15 both correspond to the same time period (partial calendar year). Consequently, both are entered in the same column and no further subscripting of the columns are necessary.

<u>Line 8.</u>--Enter the maximum rate per visit that can be received by you. Obtain this amount *from* your contractor.

Line 9.--Enter the lesser of the amount on line 7 or line 8.

2908.2 <u>Part II - Determination of Total Payment.</u>--Use Part II to determine the total Medicare payment due you for covered RHC/FQHC services furnished to Medicare beneficiaries during the reporting period.

Line 10.--Enter the rate for Medicare covered visits from line 9.

<u>Line 11</u>.--Enter the number of Medicare covered visits excluding visits subject to the outpatient mental health services limitation from your contractor records.

<u>Line 12</u>.--Enter the subtotal of Medicare cost. This cost is determined by multiplying the rate per visit on line 10 by the number of visits on line 11 (the total number of covered Medicare beneficiary visits for RHC/FQHC services during the reporting period).

29-10 Rev. 14

<u>Line 13.</u>--Enter the number of Medicare covered visits subject to the outpatient mental health services limitation from your contractor records.

<u>Line 14</u>.--Enter the Medicare covered cost for outpatient mental health services by multiplying the rate per visit on line 10 by the number of visits on line 13.

<u>Line 15.</u>--Enter the limit adjustment. In accordance with MIPPA 2008, §102, the outpatient mental health treatment service limitation applies as follows: For services rendered through December 31, 2009, the limitation is 62.50 percent; services from January 1, 2010, through December 31, 2011, the limitation is 68.75 percent; services from January 1, 2012, through December 31, 2012, the limitation is 75 percent; services from January 1, 2013, through December 31, 2013, the limitation is 81.25 percent; and services on or after January 1, 2014, the limitation is 100 percent. This is computed by multiplying the amount on line 14 by the corresponding outpatient mental health treatment service limit percentage. This limit applies only to therapeutic services not initial diagnostic services.

<u>Line 15.10</u>.--Enter the total allowable GME pass-through costs determined by dividing Medicare visits (*sum of Worksheet C, Part II, lines 11 and 13, column 3*) by the total visits (from Worksheet *C*, Part I, line 6) and multiply that result by *the* total allowable GME cost reported on Worksheet A, column 7, line 20.50. **NOTE**: If Worksheet S, Part I, line 8.50, column 1, is "N", GME pass-through costs on this line must be zero. For cost reporting periods that overlap January 1, 2011, prorate the result using a ratio of days prior to and on or after January 1, 2011, for each column. For cost reporting periods beginning on or after January 1, 2011, do not use column 1 and enter the result in column 2.

<u>Line 16.</u>--Enter the total Medicare cost. This is equal to the sum of the amounts on lines 12, 15, and 15.10.

<u>Line 17.</u>--Enter the amount credited to the RHC's Medicare patients to satisfy their deductible liabilities on the visits on lines 11 and 13, as recorded by the contractor from clinic bills processed during the reporting period. RHCs determine this amount from the provider statistical and reimbursement (PS&R) report. FQHCs enter zero on this line as deductibles do not apply.

<u>Line 18.</u>--Enter the net Medicare cost. This is equal to the result of subtracting the amount on line 17 from the amount on line 16. Enter in column 3, the sum of the amounts in columns 1 and 2.

NOTE: Section 4104 of ACA eliminates coinsurance and deductible for preventive services, effective for dates of service on or after January 1, 2011. RHCs and FQHCs must provide detailed healthcare common procedure coding system (HCPCS) coding for preventive services to ensure coinsurance and deductible are not applied. Providers must maintain this documentation in order to apply the appropriate reductions on lines 18.03 and 18.04. For cost reporting periods that overlap or begin on or after January 1, 2011, providers must complete lines 18.01 through 18.06.

Table 1 specifies the standard record format to be used for electronic cost reporting. Each electronic cost report submission (file) has three types of records. The first group (type one records) contains information for identifying, processing, and resolving problems. The text used throughout the cost report for variable line labels (e.g., Worksheet A) is included in the type two records. Refer to Table 5 for cost center coding. The data detailed in Table 3 are identified as type three records. The encryption coding at the end of the file, records 1, 1.01, and 1.02, are type 4 records.

The medium for transferring cost reports submitted electronically to contractors is compact diskette (CD), a flash drive, or a contractor approved form such as electronic mail, or a secured website. The file must be in IBM format. The character set must be ASCII. You must seek approval from your fiscal intermediary regarding alternate methods of submission to ensure that the method of transmission is acceptable.

The following are requirements for all records:

- All alpha characters must be in upper case.
- For micro systems, the end of record indicator must be a carriage return and line feed, in that sequence.
- 3. No record may exceed 60 characters.

Below is an example of a set of type 1 records with a narrative description of their meaning.

Record #1: This is a cost report file submitted by Provider 213975 for the period from April 1, 2009, (2009091) through March 31, 2010, (2010090). It is filed on *Form* CMS-222-92. It is prepared with vendor number A99's PC based system, version number 1. Position 38 changes with each new test case and/or approval and is alpha. Positions 39 and 40 remain constant for approvals issued after the first test case. This file is prepared by the independent rural health clinic facility on April 30, 2010, (2010120). The electronic cost report specification dated October 1, 2009, (2009274) is used to prepare this file.

FILE NAMING CONVENTION

Name each cost report file in the following manner:

- YY is the year in which the provider's cost reporting period ends; and L is a character variable (A-Z) to enable separate identification of files from *an* independent RHC/FQHC facility with two or more cost reporting periods ending in the same calendar
- C is the number of times this original cost report is being filed.

Name each cost report Print Image (PI) file in the following manner: PINNNNN.YYLC, where

1. PI is constant;

2. *NNNNNN* is the 6 digit CMS Certification Number;

Statistical Basis

& Code

A Worksheet A cost center label must be furnished for every cost center with cost or charge data anywhere in the cost report. The line and subline numbers for each label must be the same as the line and subline numbers of the corresponding cost center on Worksheet A. The columns and subcolumn numbers are always set to zero.

The following type 2 cost center descriptions are to be used for all Worksheet A standard cost center lines.

RECORD NAME: Type 4 Records - File Encryption

This type 4 record consists of 3 records: 1, 1.01, and 1.02. These records are created at the point in which the ECR file has been completed and saved to disk and insures the integrity of the file.

ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS-222-92 TABLE 2 - WORKSHEET INDICATORS

This table contains the worksheet indicators that are used for electronic cost reporting. A worksheet indicator is provided for only those worksheets for which data are to be provided.

The worksheet indicator consists of seven digits in positions 2-8 of the record identifier. The first two digits of the worksheet indicator (positions 2 and 3 of the record identifier) always show the worksheet. The third digit of the worksheet indicator (position 4 of the record identifier) is used to identify Supplemental Worksheet A-2-1. For Worksheet A-1, if there is a need for extra lines on multiple worksheets, the fifth and sixth digits of the worksheet indicator (positions 6 and 7 of the record identifier) identify the page number. The seventh digit of the worksheet indicator (position 8 of the record identifier) represents the worksheet or worksheet part.

ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS-222-92 TABLE 2 - WORKSHEET INDICATORS

FOOTNOTES:

- (a) Multiple Worksheets for Reclassifications and Consolidated Cost Reports
 The fifth and sixth digits of the worksheet indicator (positions 6 and 7 of the record) are numeric from 01-99 to accommodate reports with more lines on Worksheets S, Part III, and A-1. For reports that do not need additional worksheets, the default is 01. For reports that do need additional worksheets, the first page is numbered 01. The number for each additional page of the worksheet is incremented by 1.
- (b) Worksheets With Multiple Parts Using Identical Worksheet Indicator
 Although some worksheets have multiple parts, the lines are numbered sequentially. In these instances, the same worksheet identifier is used with all lines from this worksheet regardless of the worksheet part. This differs from the Table 3 presentation, which still identifies each worksheet and part as they appear on the printed cost report. This affects Worksheets B and C.

ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS-222-92 TABLE 3 - LIST OF DATA ELEMENTS WITH WORKSHEET, LINE, AND COLUMN DESIGNATIONS

This table identifies those data elements necessary to calculate an independent renal dialysis cost report. It also identifies some figures from a completed cost report. These calculated fields (e.g., Worksheet B, column 8) are needed to verify the mathematical accuracy of the raw data elements and to isolate differences between the file submitted by the independent renal dialysis facility and the report produced by the fiscal intermediary. Where an adjustment is made, that record must be present in the electronic data file. For explanations of the adjustments required, refer to the cost report instructions.

Table 3 "Usage" column is used to specify the format of each data item as follows:

- 9 Numeric, greater than or equal to zero.
- -9 Numeric, may be either greater than, less than, or equal to zero.
- 9(x).9(y) Numeric, greater than zero, with x or fewer significant digits to the left of the decimal point, a decimal point, and exactly y digits to the right of the decimal point.
- X Character.

Consistency in line numbering (and column numbering for general service cost centers) for each cost center is essential. The sequence of some cost centers does change among worksheets.

Table 3 refers to the data elements needed from a standard cost report. When a standard line is subscripted, the subscripted lines must be numbered sequentially with the first subline number displayed as "01" or "1" (with a space preceding the 1) in field locations 14 and 15. It is unacceptable to format in a series of 10, 20, or skip subline numbers (i.e., 01, 03), except for skipping subline numbers for prior year cost center(s) deleted in the current period or initially created cost center(s) no longer in existence after cost finding. Exceptions are specified in this manual. For Other (specify) lines, i.e., Worksheet settlement series, all subscripted lines should be in sequence and consecutively numbered beginning with subscripted line number 01. Automated systems should reorder these numbers where providers skip or delete a line in the series.

Drop all records with zero values from the file. Any record absent from a file is treated as if it were zero.

All numeric values are presumed positive. Leading minus signs may only appear in data with values less than zero that are specified in Table 3 with a usage of "-9". Amounts that are within preprinted parentheses on the worksheets, indicating the reduction of another number, are reported as positive values.

ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS-222-92 TABLE 5 - COST CENTER CODING

INSTRUCTIONS FOR PROGRAMMERS

Cost center coding is required because there are thousands of unique cost center names in use by providers. Many of these names are peculiar to the reporting provider and give no hint as to the actual function being reported. Using codes to standardize meanings makes practical data analysis possible. The method to accomplish this must be rigidly controlled to assure accuracy.

For any added cost center names (the preprinted cost center labels must be precoded), prepares must be presented with the allowable choices for that line or range of lines from the lists of standard and nonstandard descriptions. They then select a description that best matches their added label. The code associated with the matching description, including increments due to choosing the same description more than once, will then be appended to the user's label by the software.

Additional guidelines are:

- X Do not allow any pre-existing codes for the line to be carried over.
- X Do not precode all Other lines.
- X For cost centers, the order of choice must be standard first, then specific nonstandard, and finally the nonstandard "Other . . ."
- X For the nonstandard "Other . . . ", prompt the preparers with, "Is this the most appropriate choice?," and then offer the chance to answer yes or to select another description.
- X Allow the preparers to invoke the cost center coding process again to make corrections.
- X For the preparers' review, provide a separate printed list showing their added cost center names on the left with the chosen standard or nonstandard descriptions and codes on the right.
- X On the screen next to the description, display the number of times the description can be selected on a given report, decreasing this number with each usage to show how many remain. The numbers are shown on the cost center tables.
- X Do not change standard cost center lines, descriptions and codes. The acceptable formats for these items are listed on page 29-521 of the Standard Cost Center Descriptions and Codes. The proper line number is the first two digits of the cost center code.

INSTRUCTIONS FOR PREPARERS

Coding of Cost Center Labels

Cost center coding standardized the meaning of cost center labels used by health care providers on the Medicare cost reporting forms. The use of this coding methodology allows providers to continue to use their labels for cost centers that have meaning within the individual institution.

The four digit codes that are required to be associated with each label provide standardized meaning for data analysis. Normally, it is necessary to code only added labels because the preprinted standard labels are automatically coded by CMS approved cost report software.

Additional cost center descriptions have been identified. These additional descriptions are hereafter referred to as the nonstandard labels. Included with the some nonstandard descriptions is an "Other . . ." designation to provide for situations where no match in meaning can be found. Refer to Worksheet A, line 9 or 21.

29-520 Rev. 7

ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS-222-92 TABLE 5 - COST CENTER CODING

Both the standard and nonstandard cost center descriptions along with their cost center codes are shown on Table 5. The "use" column on that table indicates the number of times that a given code can be used on one cost report. You are required to compare your added label to the descriptions shown on the standard and nonstandard tables for purposes of selecting a code. Most CMS approved software provides an automated process to present you with the allowable choices for the line/column being coded and automatically associates the code for the selected matching description with your label.

Additional Guidelines

Categories

Make a selection from the proper category such as general service description for general service lines, special purpose cost center descriptions for special purpose cost center lines, etc.

Use of a Cost Center Coding Description More Than Once

Often a description from the "standard" or "nonstandard" tables applies to more than one of the labels being added or changed by the preparer. In the past, it was necessary to determine which code was to be used and then increment the code number upwards by one for each subsequent use. This was done to provide a unique code for each cost center label. Now, most approved software associate the proper code, including increments as required, once a matching description is selected. Remember to use your label. You are matching to CMS's description only for coding purposes.

Cost Center Coding and Line Restrictions

Use cost center codes only in designated lines in accordance with the classification of cost center(s), e.g., lines 58 through 60 may only contain cost center codes within the nonreimbursable services cost center category of both standard and nonstandard coding.

ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS-222-92 TABLE 6 - EDITS

Medicare cost reports submitted electronically must be subjected to various edits, which are divided into two categories: *l*evel I and level II edits. These include mathematical accuracy edits, certain minimum file requirements, and other data edits. Any vendor software that produces an electronic cost report file for Medicare RHC/FQHCs must automate all of these edits. Failure to properly implement these edits may result in the suspension of a vendor's system certification until corrective action is taken. The vendor's software should provide meaningful error messages to notify the RHC/FQHC of the cause of every exception. The edit message generated by the vendor systems must contain the related 4 digit and 1 alpha character, where indicated, reject/edit code specified below. Any file containing a level I edit will be rejected by your fiscal intermediary without exception.

Level I edits (1000 series reject codes) test that the file conforms to processing specifications, identifying error conditions that would result in a cost report rejection. These edits also test for the presence of some critical data elements specified in Table 3. Level II edits (2000 series edit codes) identify potential inconsistencies and/or missing data items that may have exceptions and should not automatically cause a cost report rejection. Resolve these items and submit appropriate worksheets and/or data supporting the exceptions with the cost report. Failure to submit the appropriate data with your cost report may result in payments being withheld pending resolution of the issue(s).

The vendor requirements (above) and the edits (below) reduce both intermediary processing time and unnecessary rejections. Vendors should develop their programs to prevent their client RHC/FQHCs from generating either a hard copy substitute cost report or electronic cost report file where level I edits exist. Ample warnings should be given to the provider where level II edit conditions are violated.

NOTE: Dates in brackets [] at the end of an edit indicate the effective date of that edit for cost reporting periods ending on or after that date. Dates followed by a "b" are for cost reporting periods beginning on or after the specified date. Dates followed by an "s" are for services rendered on or after the specified date unless otherwise noted. [3/31/2005]

| 1025S | If the response to Worksheet S, Part I, line 14, column 1, is "Y", and Worksheet S, Part I, line 5, column 3, is "1", then Worksheet S, Part III, lines 1 through 5, all columns, and line 6, column 2 only, must be completed. If Worksheet S, Part I, line 5, column 3, is "2", then Worksheet S, Part III, lines 1 through 6, all columns, must be completed. [3/31/2005] |
| 1030S | If the response to Worksheet S, Part I, line 14, column 1, is "Y", then Worksheet S, Part I, line 14, column 2, must be greater than 0 (zero), but if Worksheet S, Part I, line 14, column 1, is "N", then Worksheet S, Part I, line 14, column 2, must equal 0 (zero).
