HFS/Toyon HCRIS Website Update Notification

This main reason for today's update is to release the My Provider Roll Up feature and add additional documentation to our User Manual.

The My Provider Roll Up feature is found under Tools. The feature defaults to your primary provider and then compares to other providers. The filter criteria can be used to create a pool of providers that you want to compare to. This feature is being released with one comparison report for PPS providers. Let us know which other comparisons you would like to see added to this feature.

We've added more information to our User Manual. As requested by many users we have added the data specifications to the Snap Shot Reports. The .pdf of the manual can be downloaded or viewed under [Support | Manual](#).
