

Updates & Notifications

HFS IRIS Update 5.25.0.0

We recently posted a new update for the IRIS SQL system. The changes are summarized below.

[Visit Our Website](#)

Update Notes

IRIS, version 5.26.0.0:

- D17417 – IRIS - Revised edit 724 which identifies invalid characters not allowed by the CMS IRIS import, we received clarification that the character / is allowed.

Getting the Updates

If you are currently on version 5.3.0.0 or later, you can now retrieve the updates from the Home Page of the IRIS system with the Check for Updates box in the top right corner of the page, just select the Click Here button.

If you are on an earlier version, you will need to go to our website www.hfssoft.com and go to the download page. You may be asked to log in. You will want to select the IRIS link to download. If you have already installed the IRIS software, when you retrieve the download, you will see the following inside the zipped file (ignore the dates below); you will only need to run the HFSIRIS.msi. If you have not installed the system yet, then run the setup.exe.

An **updated** copy of the IRIS User Guide is located at the following link:

<https://www.hfssoft.com/doc/HFS%20IRIS%20SQL%20User%20Guide.pdf>

If you have any questions or problems with the above, please let me know.

Thanks,
Luke DiSabato
