

Dear Clients,

We recently released a software patch for the 2552-10 Hospital System. The primary reason for this patch is to implement CMS changes, repair software issues, and implement additional features.

Hospital, 2552-10, version 7.1.157.1

Calculations - Received clarification from CMS on the effective dates for the calculation of Worksheet I-5, line 8, column 1. (D001-00-010231)

Calculations - Corrected an error in the new Exhibit 5 that would cause the calculations to abnormally terminate. (D001-00-010232)

Calculations - Modified the transfer of the 410A Demo, Worksheet E, Part H, to Worksheet E, Part A. Previously, this was a transfer to line 16.50. However, CMS repurposed line 16.50 for the Pioneer ACO Demo, therefore we will now transfer the 410A Demo to line 16.55. (D001-00-010236)

Calculations - Corrected the calculation of Worksheet E, Part A, line 34 for fiscal year beginning 10/01/2013. Line 1.02 was missing from the calculation. (D001-00-010237)

CMS Directive - Modified certain edits based on a CMS Directive received 4/6/2015. (D001-00-010234)

Edits - Corrected edit 10655 for New York providers relating to Worksheet A, line 42.01 - invalid line. (D001-00-010230)

PS&R - Revised assignment for 110 report FSP as 12-31-14 FYEs was not properly placed on line 1.01 of Worksheet E, Part A, for period before 10-1-14. (D001-00-010235)
