## HFS/Toyon HCRIS Webinar

Dear Health Financial Systems client,

This e-mail is to inform you of two upcoming **Health Financial Systems Webinars** covering the HFS\Toyon HCRIS Database product.

These Webinars are being sponsored by the Southern California HFMA.

Imagine being able to re-create HFS cost report files (.mcrr) and printable PDFs for all reports that have been uploaded to the CMS HCRIS database.

This is now possible with the HFS\Toyon HCRIS Database.

We invite you to earn **1 CET\CPE credit** and to learn more about this product by attending one of our two Webinars being hosted by HFS on February 27th, 2014 and August 20th, 2014, both at 11.00AM PST.

This product is already proving invaluable to both the provider and consulting community.

Users can access a number of "snap shot" reports designed specifically to garner useful and relative information from both your Hospital, and similar Hospitals in your area.

This product is being used to "benchmark" hospitals against others of similar size and nature within their area.

In addition, with the extract feature, you can create XLSX files containing either whole worksheet series or specific cost report data from one or a specified population of cost reports.

Please join us in one of the two HCRIS Webinars to learn about this very powerful application.
