HFS/Toyon HCRIS Website Update Notification

The HFS/Toyon HCRIS website has been updated with the 4th Quarter data released by CMS on 1/24/2013. 3120 2552-10 reports and 925 2552-96 reports were added. The site has processed this data and it can be viewed in the Snap Shot reports, extracted through the Advanced Search and Extract and the .mcx and .pdf reports (for 2552-10 reports only) have been made available.

We continue to correct revisions and add features to the site. You will notice that we added links to a Provider Map. Check it out when you have a chance. It's a Google Map with green dots for CAH facilities and red dots for other facilities. You can zoom in or out, look at an area and click the dots to instantly see interesting information about the provider.
