Health Financial Systems

February 9, 2016

Dear Clients:

The HFS/Toyon HCRIS website has been updated with the 4th Quarter data released by CMS on 1/27/2016. The site has processed the new data and it can be viewed in the Snapshot Reports, extracted through the Advanced Search and Extract and the .mcrx and .pdf reports (for 2552-10 reports only) have been made available.

In addition, we have uploaded 2540-10 and 222-92 data. If you are interested in testing this data, let us know and we will give you access.

System	Newly Added Cost Reports	Total Number of Cost Reports
2552-10	6,910	56,798
2552-96	367	219,140
2540-10	5,291	67,038
2540-96	43	376,785
222-92	1,799	16,829

HCRIS website version 1.2.0.27

HCRIS

Advanced Search and Extract | Custom Data Extractor – The custom lists will now be saved automatically as the user adds specifications to the list. (001-00-010356)

Advanced Search and Extract | Custom Data Extractor – When typing in the line and column number the format needs to be X.XX. Previously if the user did not have a decimal followed by 2 numbers that line would not be extracted. Now if a line and column is entered and there is not a decimal followed by 2 numbers a '.00' will be added. (001-00-010441)

Advanced Search and Extract | Custom Data Extractor – Added the export capability to the data extractor custom specifications. This allows users to extract their custom data specs and share with others, who can then import this list into their HCRIS user account. (001-00-011509)

Advanced Search and Extract | Custom Data Extractor – If an extra decimal was entered (example x..xx) the system would error out, preventing the extract from happening. Now this will be auto corrected to delete the extra '.' so the extract will be processed. (001-00-011805)

Advanced Search and Extract | Custom Data Extractor – M-1, M-2 and M-5 were not extracting. Problem was that it expects a title, even though on the screen there is no title but the code expects there to be a title XVIII. (001-00-011848)

Advanced Search and Extract | Step 4 – A filter was added to make sure extract names do not contain invalid characters. A warning will pop up to warn the user that an invalid character was used. (001-00-010329)

Importing Data from CMS – Updated the naming convention. Some files were not available for downloading due to missing file names in the database. (001-00-011596)

My Provider List – Added a count to each list showing how many providers are in the list the users is viewing. (001-00-011496)

My Provider List – Search to Add feature was miss interpreting state OR. This has been corrected and the list of OR providers is properly returned. (001-00-011946)

Snapshot Report – New logic has been added to the snapshot reports. If a report is not available for the provider the user has selected then the snapshot report will be grayed out. If a report relates to 1 or more year(s) for that provider, the snapshot report will be available and not grayed out. (001-00-011176)

Snapshot Report – Corrected a rounding error on the snapshot reports. The last digit for numbers over 10,000,000 was being rounded to '0'. This has been corrected. (001-00-011666)

HCRIS Hospital

Snapshot Report | IPF PPS Dashboard– Added a new snapshot report to the 2552-10 HCRIS single data reports. (001-00-010788)

HCRIS SNF

Advanced Search and Extract– Modified how the system looks and determines whether the provider is considered Urban/Rural. (001-00-010852)

HCRIS RHC

222-92 HCRIS Data available for testing. Please call or e-mail to have access added to your account. (001-00-011969)
