

HFS/Toyon HCRIS Website Update Notification

Dear Clients:

The HFS/Toyon HCRIS website has been updated with the 1st Quarter data released by CMS on 4/21/2016. The site has processed the new data and it can be viewed in the Snapshot Reports, extracted through the Advanced Search and Extract and the .mcrx and .pdf reports (for 2552-10 reports only) have been made available.

In addition, we have uploaded 2540-10 and 222-92 data. If you are interested in testing this data, let us know and we will give you access.

System	Newly Added Cost Reports	Total Number of Cost Reports
2552-10	4,055	60,829
2552-96	1,112	220,845
2540-10	8,607	73,868
2540-96	0	206,888
222-92	942	31,083

HCRIS website version 1.2.0.32

HCRIS

Advanced Search and Extract - There was a bug that prevented the downloading of mcrx and pdf files of the cost report. This bug has been fixed and these recreated cost report files can be extracted again. (001-00-012059)

Advanced Search and Extract - There was a bug that shifted extract data over 1 column to the right. This has been corrected so that extracted data is in the correct columns under the correct headings. (001-00-012083)

Advanced Search and Extract - The utilization Indicator correctly shows if the report is Full or Low/No for all systems. (001-00-012084)

Advanced Search and Extract - Data received from the CMS website included duplicate cost report files and some were blank. This confused the system as to which report to extract data from, meaning some extracts were blank. We have removed these blank cost report files from the database so that now when extracting, the system will extract data from files that contain data. (001-00-012151)

Advanced Search and Extract | Custom Data Extractor - When using the 'Wildcard' to extract ALL subscripts for a particular line, the extract was not properly extracting this. This has been fixed. For example if line 60 and all of its subscripts was extracted using the 'Wildcard' (60.99), all subscripts for this particular line will be extracted. (001-00-010344)(001-00-012082)

Advanced Search and Extract | Custom Data Extractor - A warning message has been added to alert users if a custom specification list is created with the same name as an existing list name. (001-00-010785)

Advanced Search and Extract | Custom Data Extractor - Had an issue where extract processed the first few reports and then was overwriting these reports with the next few reports in the extract. This has been fixed. (001-00-012406)

Login - If a user is logged in on the HFS website, then the user will be logged in on all websites. Users will not need to re-login on the HCRIS website if already logged in on the HFS website. Conversely, if a user is logged in on the HCRIS website then the user will not need to re-log in to the HFS website. (001-00-009696)

Login - After a session has timed out, when a user logs back in to the same device or different device the parameters that were set before the time out will be saved and users will be able to work from where they left off. Example,

Advanced Search and Extract completed Steps 1, 2 and 3 but forgot to export before going to lunch. The session has timed out, user logs back on and can complete Step 4 (click Extract button) and the website will remember the criteria previously selected in Steps 1, 2 and 3. (001-00-011903)

User Manual - The HCRIS User Manual has been updated to reflect the most recent version and changes to the HCRIS database. (001-00-012608)

Wage Data Analysis - Results found were showing up multiple times. Removed these duplicates from the results found. (001-00-012095)

HCRIS Hospital

Snapshot report | DSH - Had a bug that prevented the 3rd column from exporting to a csv and pdf. This has been corrected. (001-00-012457)

Snapshot report | DSH - Had a bug that wasn't allowing the 3rd column HMO Days to load. This cell appeared blank when it should have shown data. This has been corrected. (001-00-012458)

Snapshot report | DSH - The percentages were not being formatted correctly. The decimal was not in the correct place. Example 2900% when it should have read 29.00%. This has been corrected. (001-00-012498)

HCRIS ESRD

Advanced Search and Extract | Specifications - When programming the payments specs, we missed the 'part' so the spec looked at E-1 line 4, column 1. This was incorrect and has been fixed to look at E-1, part II, line 4, column 1. (001-00-012416)
