

December 9, 2015

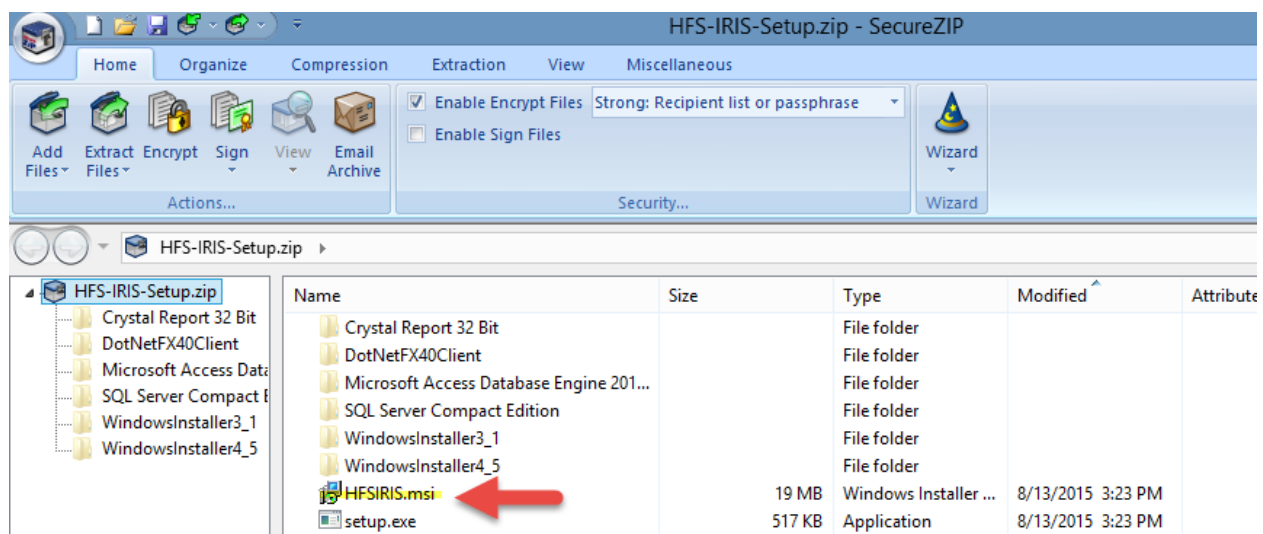

Dear HFS IRIS Clients:

We recently posted a new update for the IRIS SQL system. The changes are summarized below.

IRIS, version 5.0.3.17:

- D11486 - Rearranged the Residency Report naming section to not allow last name grouping but rather combination of last and first name when running the Residency Report sorted by Name.
- D11616 – IRIS - Corrected an issue with importing M & A xlsx files which wasn't importing all records. XLSX connection string needed updated. Once updated, all records came in and errors were properly displayed.
- D11625 – IRIS - Added date to this last sync field. It should look like this now: ##### - 12/08/2015
- D11646 – IRIS - Corrected the script to ensure tables are updated when opening or changing database.
- D11647 – IRIS - Updated the scripts to fix a few school names. Once installed, popup will display to update database lookup records.

You will need to go to our website [www.hfssoft.com](http://www.hfssoft.com) and go to the download page. You may be asked to log in. You will want to select the IRIS link to download. If you have already installed the IRIS software, when you retrieve the download, you will see the following inside the zipped file (ignore the dates below); you will only need to run the HFSIRIS.msi. If you have not installed the system yet, then run the setup.exe.

We are working on updating the system to retrieve updates directly thru the system using Help – Check for Updates like we have in the cost reporting software.

A copy of the IRIS User Guide is located at the following link:

<https://www.hfssoft.com/doc/HFS%20IRIS%20SQL%20User%20Guide.pdf>

If you have any questions or problems with the above, please let me know.

Thanks,  
Luke DiSabato
