Dear Clients:

We recently updated the software for the Interface, Hospital, SNF, ESRD, HHA, RHC, Hospice, CORF/CHMC, CHDR, LTCIR, and HO systems. The primary reason for this update is to implement CMS changes, repair software issues, and implement additional features.

Interface, MCRIF32, version 1.36.0.0:

AAI - When importing the CSV file and using the "My Data is in the format not described above" option, the "Save As" and the "Specs" button have now been made operational in the second screen. (D001-00-000457)

Task Pane - We have disabled Twitter when not available on the server. (D001-00-006595)

Worksheets - Anytime the Open, Print, Delete, etc. Forms dialog is displayed and it is found to have no worksheets to display, the "Show only forms that contain data" option (check box at the bottom) is automatically unchecked so the forms list displays. (D001-00-006491)

Data Entry - We added two lines to W/S S part I (lines 1, 2 at the bottom of the screen), to allow input of the Title and Date for the attestation/signature, on W/S S. This data will export to the ECR file and Import to W/S S. (D001-00-006533)

ECR Export/Import - We modified the export and import of Post Stepdown Offsets (PSA), applicable to pass through costs on W/S D parts III and IV, to export the "net" amount to the ECR file as a D part III or IV record, and then compute the offset amount on import, by subtracting the "net" from the B part I pass through transfer. The offset will display on the screen in the far right columns. (D001-00-006543)

ECR Import - W/S D-1, lines 43.00 and 43.01 had data in the ECR file, but we did not import the 766 days in the EC file for line 43.00. This is fixed. (D001-00-006372)

When the ECR file is imported it ties to the PI file with a $995 settlement. If you calculate, this changes to $1552. The difference is the edit overrides we show on B-1 after import.
