

January 29, 2013

Dear Clients:

We recently updated the software for the CHDR system. The primary reason for this update is to implement CMS changes, repair software issues, and implement additional features.

CHDR, version 38.7.136.1:

Data Flow- Corrected an issue where the flow from P.12, C.23, L.426 was not correctly flowing to P.8, C.1, L.325. (D001-00-006621)

Data Flow- Corrected an issue where Data from P.5.2 was not flowing correctly to P.9. This was due to amounts being in the billions. (D001-00-006624)

Creating DSK File- We had an issue where we were combining the data when creating the DSK file for P.3.2, line 22, Columns 2 and 3. This has been resolved. (D001-00-006633)
