Health Financial Systems

July 3, 2013

Dear Client:

We recently updated the software for the Interface, Hospital, SNF, ESRD, OPO, HHA, RHC, Hospice, CORF/CMHC, CHDR, LTCIR and HO systems. The primary reason for this update is to implement CMS changes, repair software issues, and implement additional features.

NEW WITH THIS RELEASE - CMS clarified Level I edit 10900, any field cannot be greater than 11 positions (the decimal is considered a position). The majority of time this occurs with B-1 statistics with line 203 Unit Cost Multiplier (UCM) where we see a stat total of "100" which triggers a large UCM, you can easily clear this by changing the stat total to 1000, 10,000, etc., so multiply the stat amounts by 1000 (add 2 zeroes, 3 zeroes, 4 zeroes, etc.) in the column and rekey and this will eliminate the edit. Basically, add enough zeroes to move the decimal point, so no more than 4 positions left of the decimal.
