Dear Clients:

The software was recently updated for the Interface, Hospital, ESRD, SNF, OPO, RHC/FQHC, Hospice, CORF/CMHC, HHA, HO, CHDR and LTCIR systems. The primary reason for this update is to implement CMS changes, repair software issues, and implement additional features.

Interface, MCRIF32, version 1.49.0.1

The system was updated to maintain compatibility.

Hospital, 2552-10, version 4.1.149.0

Transmittal Change - Updated the 2552-10 software to the new CMS Transmittal 4 specifications. Transmittal 4 is effective (i.e. MUST be used) for Cost Reporting Periods Beginning on or After October 1, 2012. However, the Sequestration changes are part of T.4, and this is effective for FYE on or after 4/1/2013. T.4 automatically computes the sequestration reduction (except for HHA, W/S H-4, line 31.01 is INPUT from PS&R). Thus, you may use T.4 to file a FY Begin prior to 10/1/2012. This transmittal updates Chapter 40, Hospital and Hospital Health Care Complex Cost Report, (Form CMS-2552-10) to clarify and correct the existing instructions, incorporate statutory and regulatory changes, and comply with an Executive order.
