

November 21, 2013

Dear Clients:

The software was recently updated for the Hospital system. The primary reason for this update is to implement CMS changes, repair software issues, and implement additional features.

**Hospital, 2552-10, version 4.3.149.1**

Edits - Modified Edits 10450S, 12005S, 12008S and 20050I. Added edits 12950S, 13350S, and 13380S. (D001-00-008885)

Form - Lock worksheet S-2, Part I line 25, column 6 if FYB on or after October 1, 2012. (D001-00-008885)

PSR - Correct PS&R problem where the file appear to be blank. This fix will not bring back the mcp data but rather fixes the program to not blank out in the future. If you have the files on a network, please check with your IT to see if you can restore the mcp file from a couple days ago. If not, you will need to delete the existing mcp and mcp.bk\_ and start over by importing csv file, ensuring Provider Cross Reference is proper, assigning and exporting. (D001-00-008887)
