

October 26, 2012

Dear Clients:

We recently updated the software for the Interface, Hospital, SNF, ESRD, and HO, systems. The primary reason for this update is to implement CMS changes, repair software issues, and implement additional features.

Interface, MCRIF32, version 1.33.0.0:

Printouts - Added logic to create internal bookmarks in PDF files when print to PDF option is utilized.

Hospital, 2552-10, version 2.41.133.0:

339 - Fixed a problem where users could not open the 339 exhibits unless they first opened a cost report worksheet. (D001-00-005956)

Data Entry - we added an option for "AGGREGATE" to the dropdown list for Worksheet A-8-2, column 2. If selected, we use the description "AGGREGATE-" plus the first 25 characters of the cost center description. (D#001-00-005852)

Edits - we modified the logic for HCRIS consistency edit #118, which issued if S-7 line 201 is populated, but no S-2 part I line 7 or 9, column 2, is present. However, line 9 column 2 was there. This is fixed. (D#001-00-005885)

Edits - we modified Level I edit 10655 logic, for line 116.01, with cost center code 11601, to be acceptable. This Hospice subscript was not in the logic. (D#001-00-005922)

Management Reports - Report 114 was not reporting actual per diem on lines 42-47. This is fixed. (D001-00-005861)

Printouts - the Provider changed data in the MCRX file and then printed all the worksheets to a PDF. The old original encrypted worksheet S (with old W/S S settlement from PI and EC file) remained in the pdf. This is fixed. (D#001-00-004816)

PS&R - Added a check to determine the form set used to create the .MCP file. If the .MCP file was created in another form set the system will rename the file with an extension of ".96.mcp" and create a new mcp file for the 2552-10 file. (D001-00-005842)

Special Reports - we modified SP#903 and 917, to use our State Code list for the rates, if applicable, instead of the prior use of identification. (D#001-00-005884)

Worksheets - Corrected opening of worksheets from the quick-launch drop-down on the tool bar. Selection of "B1" caused the Open | Forms dialog to display in lieu of B-1. (D001-00-005873)

Worksheets - Modified C, Part II columns 1 and 2 to transfer from Worksheet B, Part I column 26, always following the same transfer logic as Worksheet C, Part I. (D001-00-005931)

Hospital, 2552-96, version 25.32.133.0:

Edits - we issued Level I edit 1030S in the adjusted report, because an adjustment had removed the Renal component on S-2, and we were expecting it to be there since it was in the Original MCR file. This is fixed. (D#001-00-005895)

SNF, 2540-10, version 3.21.133.0:

339 - Fixed a problem where users could not open the 339 exhibits unless they first opened a cost report worksheet. (D001-00-005955)

Calculate - We now auto open S-3 part II, when W/S A is open and line 100 has an amount. (D#001-00-005921)

PS&R - Added a check to determine the form set used to create the .MCP file. If the .MCP file was created in another form set the system will rename the file with an extension of ".96.mcp" and create a new mcp file for the 2540-10 file. (D001-00-005854)

Screens - S-2, Part I, Line 39 "occurrence" is misspelled as "occurence". This is fixed. (D#001-00-005883)

Special Reports - The 800 report was not properly comparing when one report had a worksheet open but the other did not. This is fixed. (D001-00-005961)

Worksheets - Corrected opening of worksheets from the quick-launch drop-down on the tool bar. Selection of "B1" caused the Open | Forms dialog to display in lieu of B-1. (D001-00-005872)

Worksheets - Corrected calculation of W/S S-3, Part III subscripts of line 13. We were duplicating the parent line value to the subscripts. (D001-00-005941)

SNF, 2540-96, version 18.28.133.0:

The system was updated to maintain compatibility with the Interface.

ESRD, 265-11, version 1.24.133.0:

339 - Fixed a problem where users could not open the 339 exhibits unless they first opened a cost report worksheet. (D001-00-005956)

Printouts - Worksheet A-4 was not printing as part of the PI file. This was fixed. (D001-00-005720)

PS&R - Added a check to determine the form set used to create the .MCP file. If the .MCP file was created in another form set the system will rename the file with an extension of ".94.mcp" and create a new mcp file for the 265-11 file. (D001-00-005855)

Worksheets - The first time a cost report file is opened when you type B1 without the dash in the worksheet box, worksheet B-1 doesn't open, rather the open worksheets dialog box is displayed. This is fixed. (D001-00-005871)

ESRD, 265-94, version 9.37.133.0:

The system was updated to maintain compatibility with the Interface.

HO, 287-05, version 1.35.133.0:

The system was updated to maintain compatibility with the Interface.
