Health Financial Systems

September 5, 2014

Dear Client:

We recently updated the software for the Interface, Hospital, SNF, ESRD, HHA, HO, RHC, Hospice, CORF/CMHC, OPO, CHDR and LTCIR systems. The primary reason for this update is to implement CMS changes, repair software issues, and implement additional features.

 In addition, for Hospice clients this release includes a working beta version of the new Form CMS-1984-14 software. This version can be used to review the new form set but cannot be used for filing purposes. Once approved, HFS will make a fully functioning version of the software available to users of the Hospice Form CMS-1984 software.

Interface, MCRIF32, version 1.55.0.4
