

Brian Mills

I am 27 years old and I have lived in Florida all my life up until a few years ago when my wife began attending PA school in North Carolina. That is where we reside now.

I started working with First Coast in 2007 after getting out of high school keying Medicare Claims. In September 2008, I transferred to the Provider Audit & Reimbursement (PAR) department and I've been there ever since. I've been involved in processing and accepting Medicare cost reports as well as participating in various workgroups to push automation for our processes. During the course of working in PAR I've had the opportunity to work with the JE, JH, JL, and JN contracts.

I am currently attending school for Computer Science but my wife's profession has changed my mind and I instead am working to become a doctor now.
